

SPECIFY THE LENGTH OF YOUR WATCH STRAP

Please ensure to change your printer's scaling settings to "actual size". That way, you will print true to scale on a DIN-A4 sheet of paper.

Cut out the measuring tape after printing.

Measure your wrist

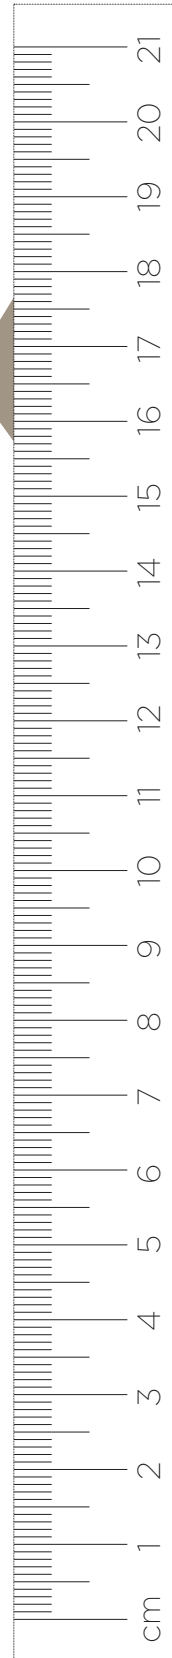

Hold the measuring tape to your wrist from above and read the measurement at the point it touches.

Reading your measurement

Read the measurement at the touching point and enter it in the field provided during the checkout process. Please don't forget to mark your preferred fit (tight, normal or loose). Our watchmakers will be pleased to adapt the watch strap to your preferred fit.

Please check the correctness of the measuring tape against a ruler, as printing can lead to distortions.
